## HSEC Online® Modules

Digitise the management of your Equipment and Equipment Documentation using the **HSEC Online® Equipment and Asset Module**

### Equipment and Asset Module

The HSEC Online® **Equipment and Asset Module** enables you to capture and manage all your equipment details and all the documentation that you need to store for your equipment. Use HSEC Online® to function as your online asset register and equipment document management system.

Perfect for equipment big or small. Equipment types and custom fields are configurable and can be set up based on your needs, allowing you to use the system for everything from first aid boxes to credit cards to vehicles and cranes. Examples of documentation that you can store include licences, load tests, inspection registers, warranties, checklists, and whatever else you need.

Use the HSEC Online® Equipment and Asset Module to allocate equipment to either specific employees or assign it to a department. HSEC Online® stores all history of equipment allocation so reporting can easily be done to see who uses specific equipment at a certain point in time.

Within this Module you can also generate QR codes for your equipment. These QR codes can then be scanned using the HSEC Online® Mobile App to show you the details of the piece of equipment as well as all documentation that you are storing for the equipment:

- ✓ Capture and manage all your equipment details
- ✓ Use HSEC Online® as an asset register
- ✓ Manage documentation for your equipment
- ✓ Allocate equipment to employees and view history of allocations
- ✓ Generate QR codes for equipment and use the HSEC Online® Mobile App to scan and view details and documentation of your equipment
- ✓ Use the HSEC Online® Mobile App to capture checklists for equipment.

**Don't be reactive, get proactive with HSEC Online®**
