

TOOLBOX TALK 52/60

TOPIC: ACCIDENT EXCUSES

OBJECTIVE: TO ENSURE EXCUSES ARE NOT THE REASONS FOR ACCIDENTS

DID YOU KNOW?

You can use the HSEC Online[®] Ticket Module to capture and track Incidents, Accidents and Near Misses!

Safety isn't just luck!

It involves following the safety rules, doing a job the right way, and watching out for one another.

There is no excuse of not acting safely:

- ✚ I was in a hurry
- ✚ The job was just going to take a minute
- ✚ I got distracted
- ✚ I had never done the job before
- ✚ Nobody told me how to do it
- ✚ Well, no one was looking
- ✚ It was too heavy
- ✚ It was too dark
- ✚ I didn't get much sleep last night.

- ✓ Take the time to discuss other lists of 'alibis' and excuses that people have used and ask what really should have been done to prevent each unsafe act.
- ✓ Stress safety pre-planning of the task, having the right equipment and how doing it right eliminates the need for excuses and accidents.
